Notification Sent
Per. I. E. P. A. Act §39(c)

Reference to: Roxana/SCA Barton #2 - 11909002
Developmental Permit #1982-43-DE
Supplemental Permit #1983-53

JUN 21 1983

DL/NPC

Dear Mr. Eastep:

All site development work as detailed in our site plans and as stipulated by the above referenced permits, is now completed. This letter, then, will serve as our formal request for a pre-operational inspection and a final determination to be made by your office, upon the matter of re-issuance of an Operating Permit to this site.

I would like to mention at this point, that the timing of this final review is quite critical to us. The presently operating Barton #1 Site, adjacent to Barton #2, is nearing completion and we predict, its remaining life, to be, no more than six (6) weeks maximum from this date. At the end of that time, we will be forced to either move operations to the Barton #2 site, if permitted, or cease operations entirely. Any assistance that you can give us in expediting this review procedure would be greatly appreciated. We are prepared to meet with your review staff as needed, to quickly resolve any questions they might have concerning technical aspects of the site development and operation.

Illinois Environmental Protection Agency
Mr. Lawrence Eastep
P.E. Manager, Permit Section

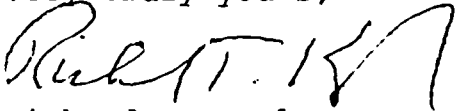

Ref; Roxana/SCA Barton #2 - 119099002
Developmental Permit #1982-43-DE
Supplemental Permit @1983-53

Additionally, there is the matter of our existing Supplemental Special Waste Disposal Permits at Barton #1. Should an Operating Permit be issued for Barton #2, I would appreciate, if it could be arranged by permit condition to transfer directly, these Supplemental Permits, to the new site. This would alleviate the necessity of re-applying for each waste stream to be permitted in Barton #2. In this way, we could provide uninterrupted disposal service to our special waste customers.

Should you have any questions regarding the above, please do not hesitate to contact me (314/241-3721).

Thank you in advance for all your kind consideration and assistance, as to regards this matter, I remain.

Very truly yours,

Richard T. Kogler
Landfill Environmental Manager
